

INTELLIGENT AGRICULTURE MANAGEMENT

TAKE CONTROL OF YOUR AGRICULTURAL PRODUCTION

HOW?

Track all activities and finances

Optimize production processes

Lower costs, increase yield & profits

FARMS

Plan, track and analyze all activities per crops and locations using farms. Built-in knowledge base of best-practice processes lets you easily plan the entire season and take control over your farms.

FIELDS

Keep records of all your fields and ensure the optimal usage level of every field with field utilization overview. Plan crop rotation, keep soil analysis records and get the best out of your fields.

FINANCES

Know your numbers. Keep track of sales, expenses, investments and cash flow. Analyze finances per farm, crop and season to understand your return on investment and navigate towards profitability.

FARM ANALYTICS

Simple, but powerful dashboards help you identify what to improve with fast visual overview over all farming details. Identify what to improve and which crop varieties bring you higher profits.

WEATHER MONITORING

Monitor detailed weather conditions per each field with 7-days forecast and even 3 years weather history. Whether you are interested in rainfall, temperatures or dew points per field, it is all here in one place.

REPORTS

More than 20 different reports let you get any information you need in a simple and fast way. Whether you need them in PDF, Word, or Excel, get them with a single click.

SMART ALARMS

Get notified when there is an upcoming storm or when there is risk of pest and disease occurence on your fields. Reduce risks and make on time prevention with the help of our smart alarms.

AVAILABLE ON COMPUTERS AND SMARTPHONES

PEOPLE

Find all data about your full and part-time employees at one central place. Create tasks, assign them to employees and monitor their execution progress.
